

Dear Mr. Pedro Larrañaga,

I am currently a third-year student at CESI Engineering School (France), and I will be entering my fourth year in September 2025. At that time, I am required to complete a six-month internship. I have taken a strong interest in the work conducted by your group in the field of artificial intelligence, and I would like to contribute to your ongoing projects during this internship.

I have developed skills in building AI solutions (RAG, generative models), data processing and visualization (Power BI), and cloud integration (Azure, GCP). My previous experience in a research lab also allowed me to work on an AI project involving image recognition. I am highly motivated to support your work with a rigorous and practical approach.

Sincerely,

Tom PEREZ LE TIEC
